## Featured Project: 8370 Wilshire Boulevard

We are pleased with the completion of our project at **8370 Wilshire**, where we modernized the entire building façade. Notable updates include the installation of a custom paneling system, design and installation of brushed stainless steel signs, smooth stucco finishes, custom painted flashing, glass and stainless steel balconies, paint coatings to match panel work, and custom steel canopies. Just another great example of how **Spectra Company** is able to enhance the functionality and appearance of building façades; and represents the range of options Spectra Company can provide to our clients.

If you have any questions about the project please feel free to contact Tim Harris Sr.  
at [THarris@SpectraCompany.com](mailto:THarris@SpectraCompany.com)
